

Project Introduction

Instructor

Kartik Nighania

MLOps Engineer at Typewise

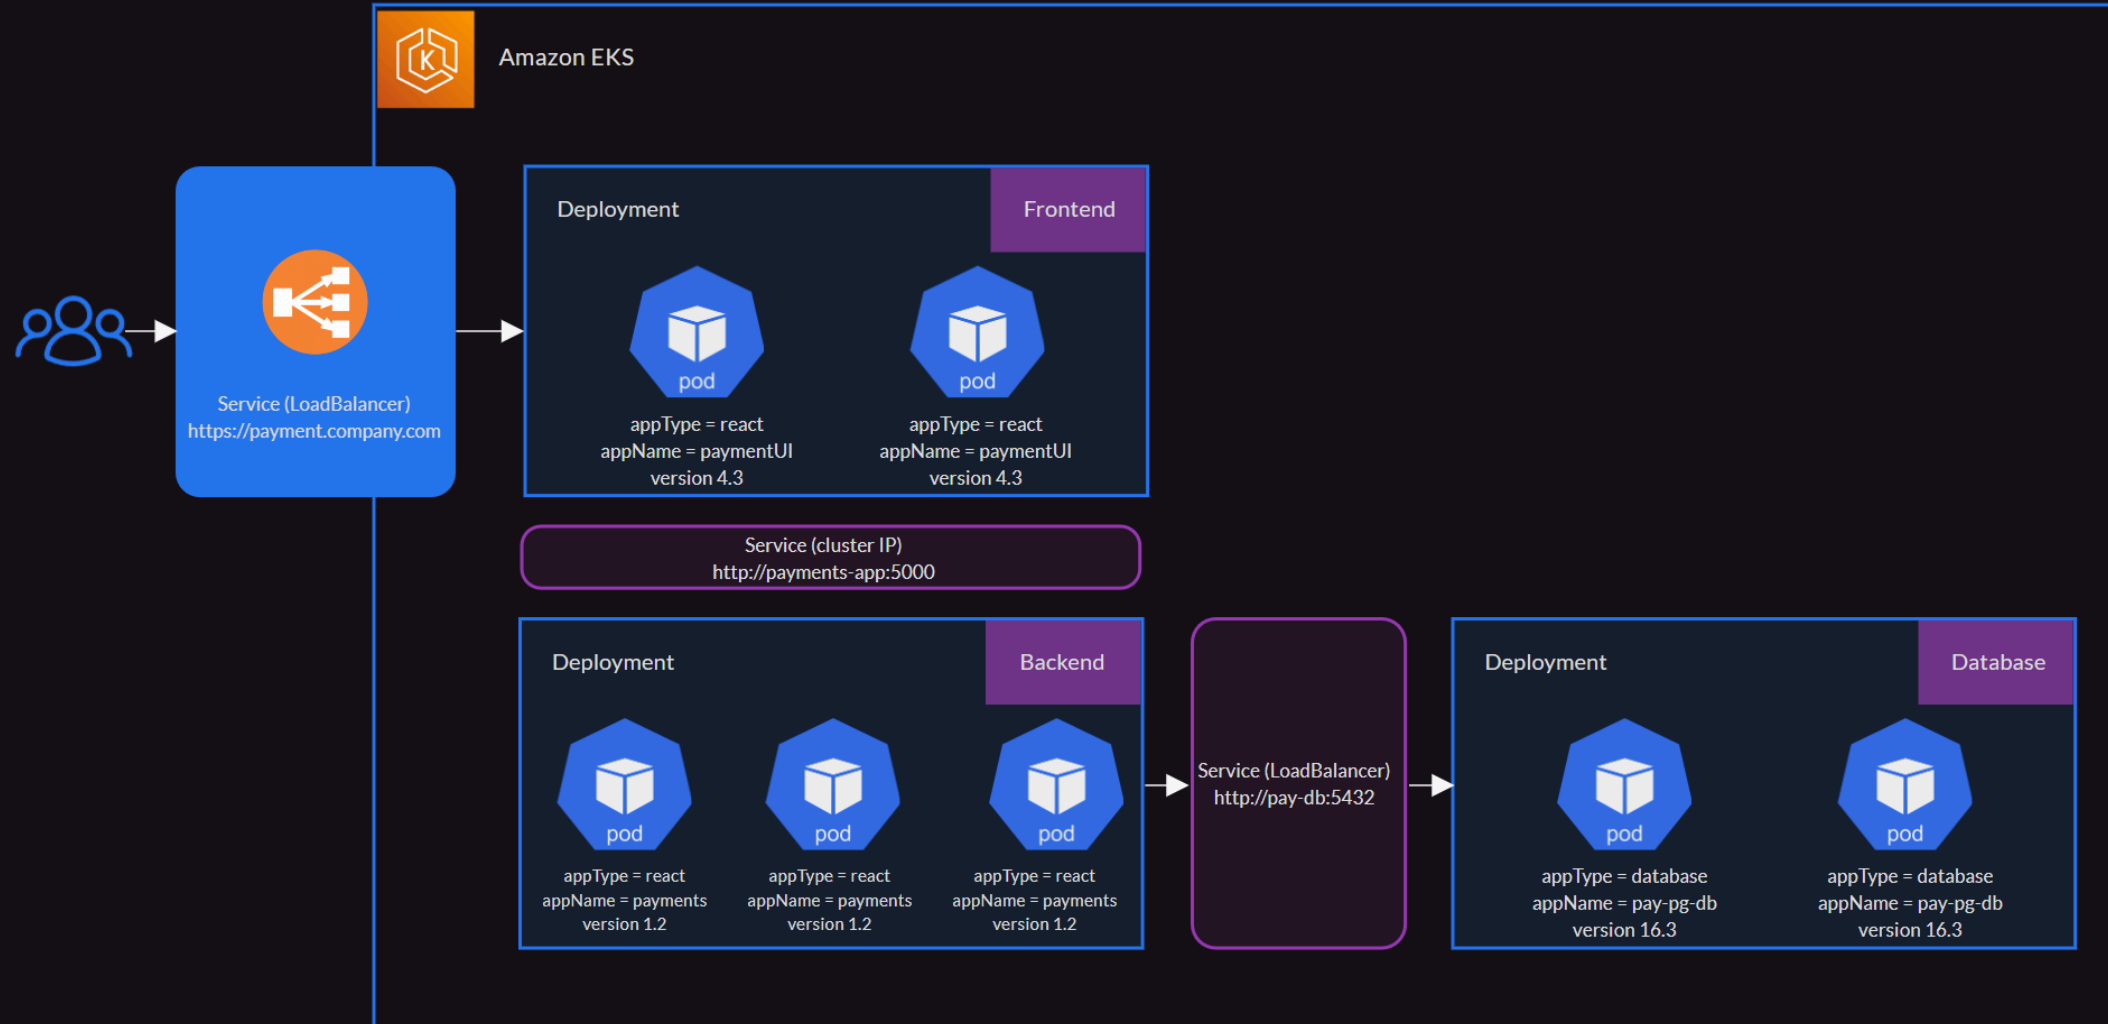

Ex-Head of Engineering - YC-backed startup

Certified AWS Cloud and Kubernetes Engineer

Open source contributor

Microservices

Project Overview

Advantages of LoRAX:

- State-of-the-art serving throughput
- Efficient management of attention key and value memory with Paged Attention and flash attention
- Continuous batching of incoming requests
- Many quantization available such as GPTQ, AWQ
- Optimized CUDA kernels

Project Overview

Create a Kubernetes cluster

Create a deployment in K8s with the docker container

Thank You
