

What is Reinforcement Learning

Instructor

Dr. Mayank Baranwal

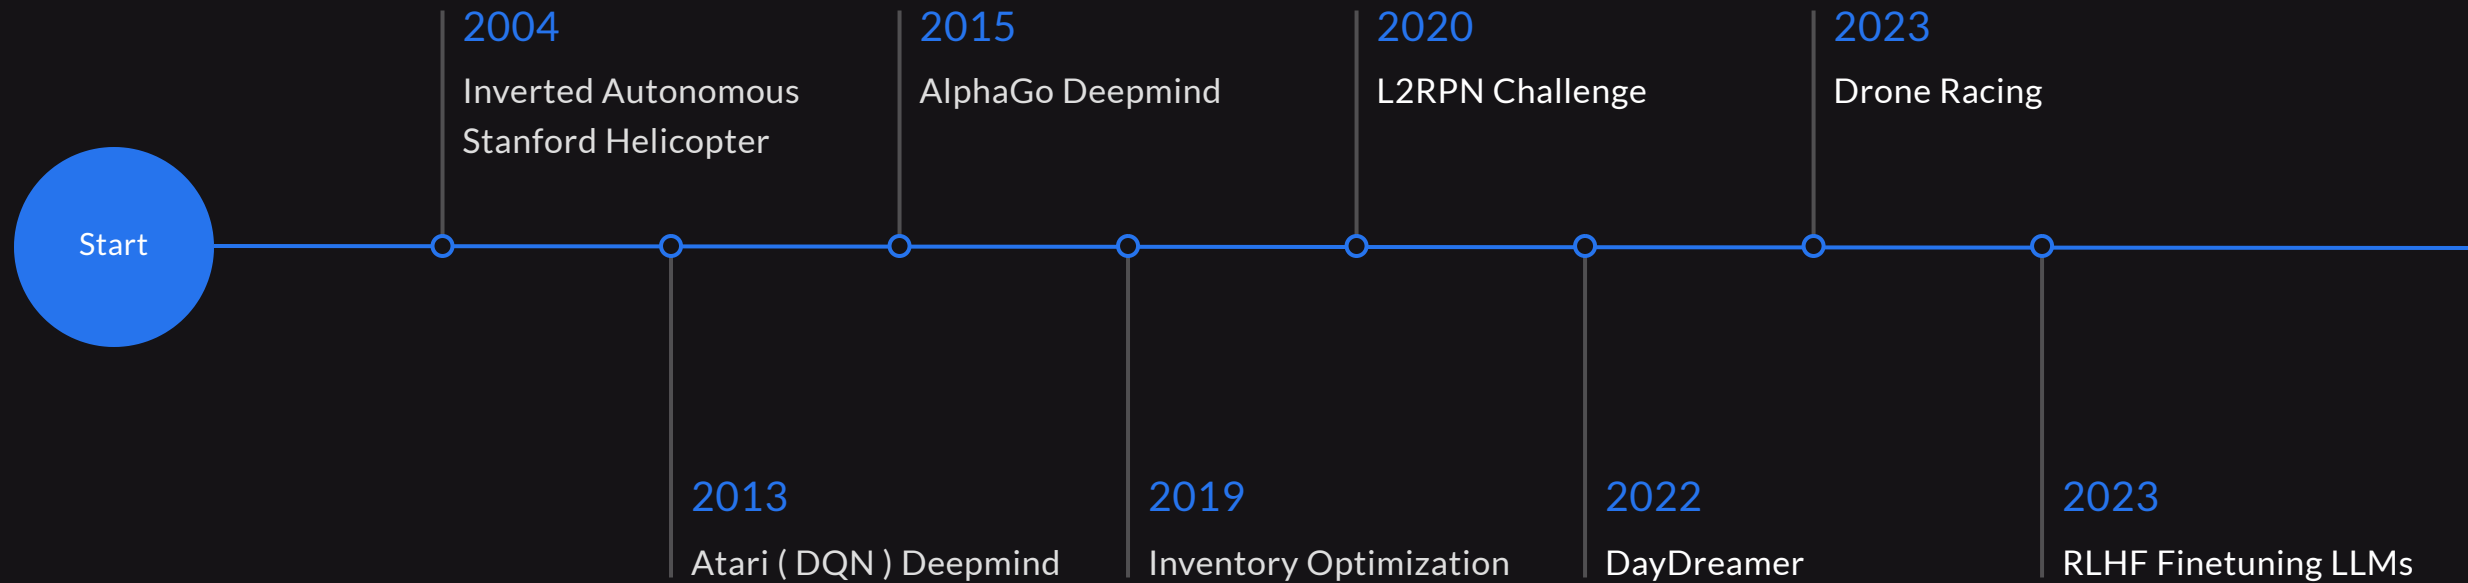

Senior Scientist, TCS Research

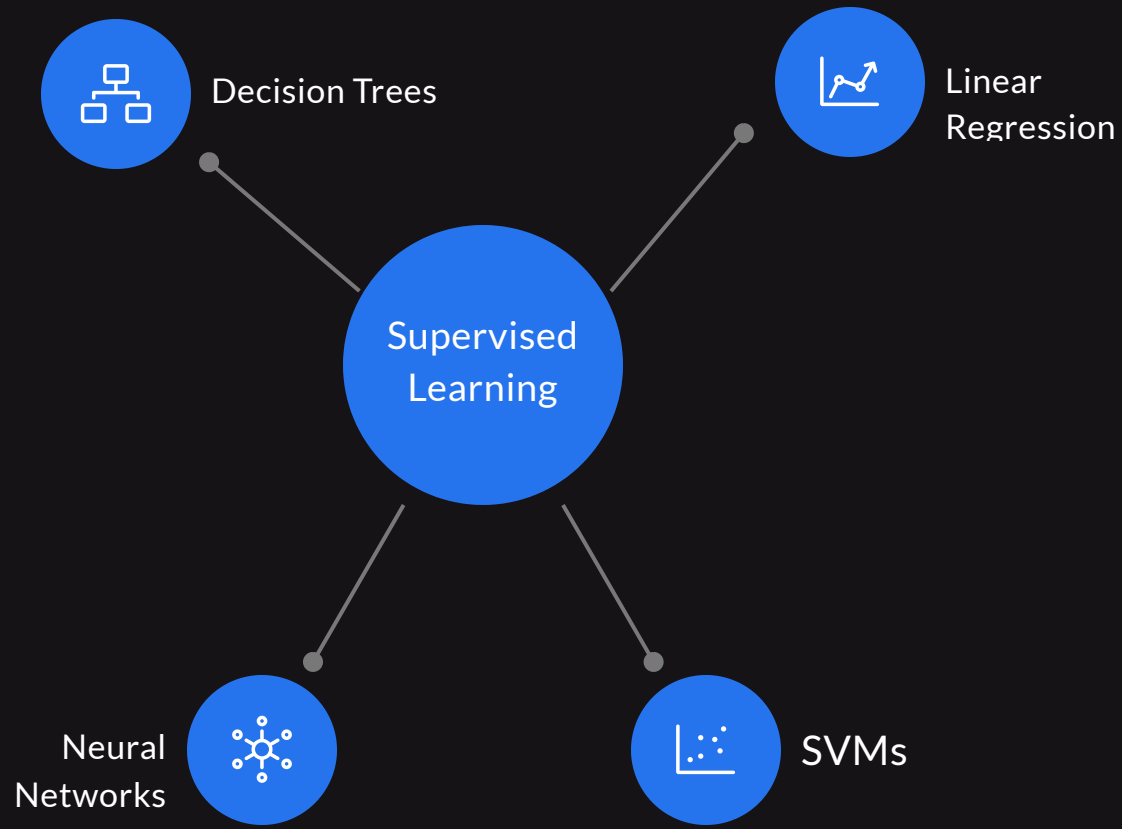

Sequential Decision-Making in Various Domains

Reinforcement Highlights

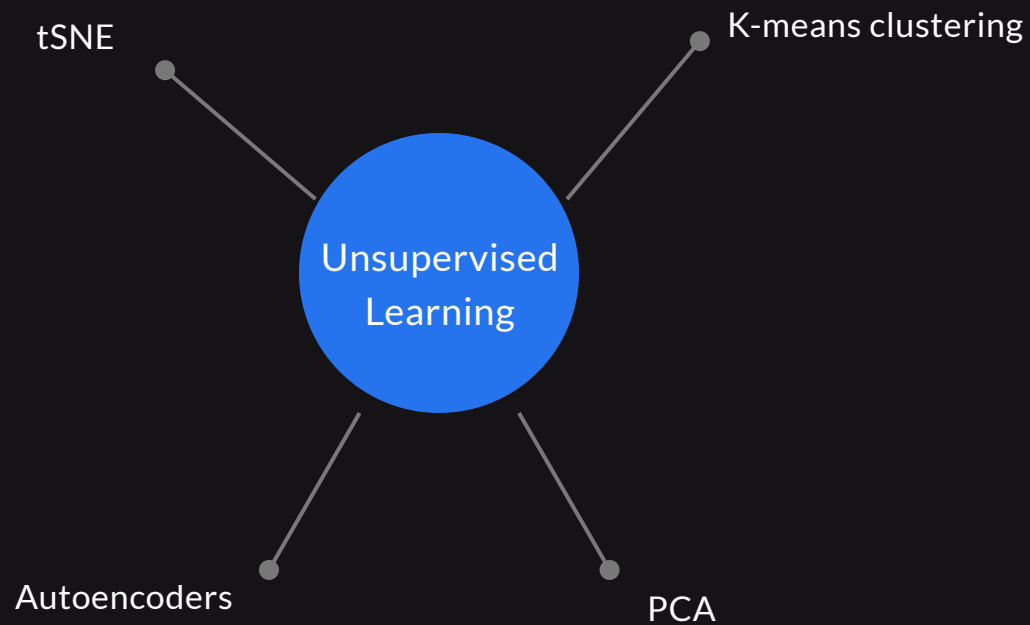

Branches of Machine Learning

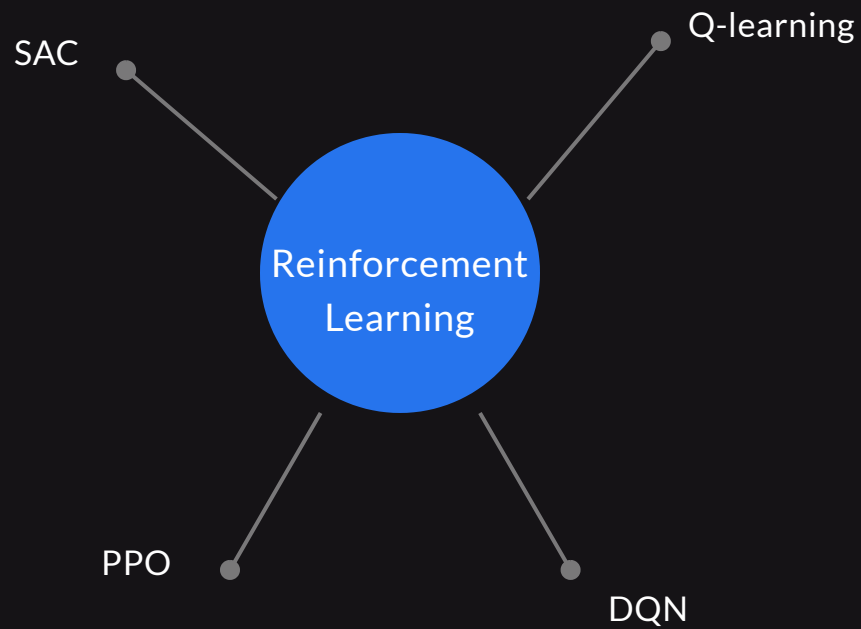

- E-mail spam detection
- Image classification
- House price prediction

Branches of Machine Learning

- Customer segmentation
- Dimensionality Reduction
- Anomaly detection

Branches of Machine Learning

- Learning to bike
- Autonomous driving
- Game playing

What Makes RL Different?

- No Supervisor

Feedback through a reward signal

- Delay in Feedback

Consequences of an action are not always immediate

- Time Matters

Same action at a different time may not be rewarding

- Agent's actions affect the subsequent data it receives

Agent's policy directly affects its learning process and the environment's behavior

Thank You
