What are Tools?

TOOLS

ArXiv

DuckDuckGo

Google

SerpAPI

Tavily

SQL

Wikipedia

- Tools are interfaces that an agent, a chain, or a chat model / LLM can use to interact with the world
- In LangChain, tools consists of the following components:
 - Tool name
 - Tool description
 - JSON schema of tool inputs
 - Functions to call
 - Result format

Tavily

- LangChain has interfaces with many popular tools including:
 - ArXiv
 - Tavily Search
 - DuckDuckGo Search
 - Wikipedia
 - Google Search API - SerpAPI
 - And many more...
- You can build your own custom tools, modify existing tools and connect them to LLMs

Using Tavily AI Search - Sign In for an account

Using Tavily AI Search - Get your API Key

The screenshot shows the Tavily AI web application interface. The browser address bar displays 'app.tavily.com/home'. The left sidebar contains navigation links: Overview, Research Assistant, Research Reports, API Playground, and Documentation. The main content area is titled 'Overview' and features a 'Researcher' plan card with a 'CURRENT PLAN' label and a 'Manage Plan' button. Below this, the 'API Limit' is shown as '0 / 1,000 Requests'. The 'API Key' section includes a text input field containing 'tvly-*****', a toggle for visibility, a copy icon, and a 'Regenerate' button. A red rectangle highlights the API key input field. At the bottom, there is a 'Contact us' button.
