

Production MLOps Pipeline

Raw Data
S3 (Parquet, Delta) + Glue
Catalog

Feature Engineering:
SageMaker Processing Jobs →
SageMaker Feature Store

Training
SageMaker Pipelines (triggered by EventBridge on
schedule or data drift)

Tracking
MLflow on SageMaker / SageMaker Experiments →
Model Registry

Approval Gate
Manual/auto approval in Model Registry

Deploy
SageMaker Real-Time Endpoint (p/m-series) with autoscaling
OR SageMaker Batch Transform (for nightly batch scoring)

Monitor
SageMaker Model Monitor (data drift, model quality)
SageMaker Clarify (bias detection)
CloudWatch (latency, error rate, invocations)

CI/CD
CodePipeline → CodeBuild → SageMaker Pipelines SDK
